Qairat Sūltan

Software Engineer Developer & Team L
Nur-Sultan, Kazakhstan

Summary

As a senior developer, I led a team of developers to build and
maintain a REST API using Django Rest Framework. I worked to
ensure that the code was well-documented, scalable, and easily
maintainable. I also set up a DevOps pipeline for continuous
integration and deployment, using tools such as Jenkins, Docker,
and Kubernetes. In my role as a team lead, I worked closely with
project managers and stakeholders to ensure that the project was
delivered on time and met all requirements.

As a DevOps engineer, I was responsible for automating the
deployment of new software releases, ensuring high availability
and scalability of the infrastructure, and monitoring the performance
of the systems. I set up and configured monitoring tools such as
Prometheus and Grafana, and implemented continuous integration
and delivery using tools such as GitLab CI/CD. In addition, I
provided mentorship to junior engineers on my team, helping them
improve their skills in areas such as scripting, automation, and cloud
infrastructure.

As a team lead at a software consulting company, I managed a team
of developers working on different client projects. I ensured that each
project was staffed appropriately and that each team member had
the resources they needed to succeed. I also worked closely with
clients to understand their needs and provided technical guidance
to the team to ensure that the solutions delivered met those needs.
As a mentor, I provided guidance and feedback to team members to
help them grow their technical and interpersonal skills, and I worked
to create a positive and inclusive team culture.

As a mentor at a coding bootcamp, I worked with a group of aspiring
developers to teach them the fundamentals of programming and
web development using Django Rest Framework. I provided
feedback and guidance on their code, helping them improve their
understanding of object-oriented programming, database design,

and RESTful APIs. I also provided guidance on soft skills such as communication, time management, and collaboration, helping the students develop the skills they needed to succeed as developers.

Experience

LLP "Dary Adyi"
Back End Developer
August 2022 - Present (8 months)
Nur-Sultan, Kazakhstan

ABBA Coding
Freelance Web Developer
January 2023 - March 2023 (3 months)
Tashkent, Uzbekistan
